# SKILLS

# **Programming & Development Literacy**

AngularJS React CSS3
HTML5 JQuery Bootstrap
Basic Python C++
MEAN Stack Ruby on Rails Sinatra

**Design Tools** 

Wireframing Trello Adobe CS Sketch

### **EDUCATION**

# **General Assembly**

Web Development Immersive – Summer 2016 Junior Full-Stack Web Development Course Howard University

Computer Science & Mathematics – Spring 2016

Montgomery Community College General Studies – Spring 2012

# **EXPERIENCE**

# U.S. Department of Energy

Lead Web Developer for Shivan Computers Corp.,

November 2016 - Current

As a developer at Shivan, I oversaw some of the Department's greatest technology assets and managed customer/end user relations for internal applications. My position with Shivan and the Department of Energy was my first large step into a career in software.

# W7th Design Studio

Senior Web Developer,

October 2016 - Current

W7th is a start-up branding and design studio founded by a good friend of mine. I was brought onto the team as a junior front end developer and was quickly promoted. Currently, as the only senior developer on the team, I oversee all web projects and have a hand in branding designs as they often impact our development process.

# General Assembly Washington, DC

Web Development Immersive Fellowship,

Instructional Associate DC Campus

June 2016 - Jan 2017

I took the web development immersive course at General Assembly in the summer of 2016, in order to give back. General Assembly gave me the tools necessary to turn formal education into practical and marketable skills that I will use for the betterment of my community. As a result, after graduating, I was privileged enough to have been offered a position on the instructional team for some of our part time web development courses.

# AP Technologies LLC, Washington, DC

Founder & Chief Executive Officer.

November 2014 - June 2016

AP Technologies serves to create technology solutions for individuals and local businesses. After working as a 3rd party independent contractor for a tech-support giant, I found that my talents for hardware and software implementation would better serve my own industry growth by capitalizing on small business interests.

# Apple Inc., Bethesda, MD

Sales & Business Marketing Specialist, 2014 - 2015

# University of Dar Es Salaam, Tanzania

Transportation Engineering Research, 2014

During my time at the University of Dar Es Salaam, I developed a traffic light system that actuates on real time traffic conditions. Leveraging just one year of python programming experience, I worked on a team of 4 engineers on bettering traffic systems in a third world country with the hopes of lessening accidental deaths and creating systematically safer pedestrian traffic-management.
